

Hey ! Your account is now suspended, see ya !

11. Jan.

No problem ;) Will not use your bad service.

11. Jan.

That you were paying and using for two years, yeah, hope Premiumize paid you a lot for this review :)

11. Jan.

BTW "Update 11.02.2017", you know we are in January right ?

11. Jan.

thanks a lot for this hint ;)

I paid you for 2 years? this was the first time with a premium membership

11. Jan.

premiumize did not pay anything. the service is just working. your service is not. I you want to critcise my review constructively please go on. You can add a comment which I can publish if you wish.

11. Jan.

and I even did not pay it, I used the points from referd users....

11. Jan.

facebook.com/realdeb/posts/...

Your account is unlocked since few days and you also had these days, feel free to try our service again without assuming our service is and always has been bad (based on the topic you saw on JD Board)

16. Jan.

BTW, Premiumize status is here: real-debrid.com/compare
If a 9.1/10 is that kind of service I think we are over this note ...

16. Jan.

Why do you assume that you are better then Premiumize?

does not seem fixed

5 Std.

And how does it prove the problem is coming from us ? Based on what you said everywhere I don't see any valid point to believe you are not paid by premiumize because you are writing to avoid our service at all cost, so we just gonna ignore you and tell : fuck you.

When you will be more mature and going to make a real review feel free to contact us.

1 Std.

I am just fair and give you the chance of explain or solve the issue. Feel free to explain me why its not your fault. By the way: Very mature to block my account ;) I didn't say that anyone should "avoid your service at all cost" I just can't give a recommendation for your service and I think I made the reasons clear. At the end it does not matter if its JDs fault or your fault. You advertise your service with JD so its your responsibility to make it work or just announce that there is no JD support.

50 Min.

And I never said that the screenshot is a prove that it comes from you. You told me its fixed and I just tested it again (to give you a better rating) but the problem still occurs.
